 saltify

Saltify - Sprint 2 Canvas

Sprint 1 Completed:

FormBuilder UI Skeleton Complete

Top Navigation with Logo, Search, App Launcher, Profile

Field Palette Placeholder

Inspector Placeholder

Canvas/Grid for Form Layout

Create Button Working

Dark Mode Support

Sprint 2 Plan:

1. Drag-and-Drop Field Components

    - [ ] Draggable Text, Number, Email, Dropdown

    - [ ] Drag into canvas columns

2. Field Inspector Panel

    - [ ] Update field labels, placeholder, required, etc.

    - [ ] Conditional logic UI

3. Layout Enhancements

    - [ ] Add/Remove Columns Per Row

    - [ ] Drag to reorder rows

4. Save & Preview Flow

    - [ ] Save form layout structure

    - [ ] Preview mode for test rendering

5. Auto Sync

- [ ] Real-time update in canvas & inspector

6. UI Polish
    - [ ] Match spacing, padding, and alignment
    - [ ] Responsive tweaks

Priority Order:

 Start with Drag-n-Drop + Inspector first.

 Then Save/Preview, then Layout polish.
